STRAP ON

Elasticated shoulder straps have bags of adjustment, or can be removed all together if the desire takes you.

NINE LIVES

The Pro L2K isn't spent after one off. Offering 'Repeat Performance Technology' - keeping you safe and offering great value for money.

FORCEFIELD PRO L2K

£99.99 FORCEFIELDBODYARMOUR.COM

Some things you just feel safe in, and Forcefield kit does it for me. The Pro L2K is made from high-tech NitrexEvo material and stitched together with Kevlar thread for strength. The high-tech material can stand up to a right beating and is usable even after multiple impacts. Each layer is perforated and stitched in a way to allow decent movement. This creates extra comfort, while the whole back protector moulds to your back for all day riding comfort.

Andy

TAIL (BONE) TIDY

Extended lower section is great for protecting your coccyx, although can get in the way a little if not on a sportsbike.

ADJUSTABLE

Plenty of adjustment here with a double waistband. Strong, long lasting velcro to ensure seasoned use.
